

AMAN SIDDIQUI

Software Engineer · AI/ML Integration Specialist

aman.siddiqui114@gmail.com | +91 941 558 4405 | Noida, India (Open to Relocation — Australia)
LinkedIn: linkedin.com/in/aman-siddiqui | GitHub: github.com/aman-siddiqui | Portfolio: aman-dev.io

PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with 3+ years of experience designing and delivering high-performance, cloud-native backend systems using Java (8/11/17), Spring Boot, and Microservices at MetLife and Deloitte. Proven track record integrating Generative AI and Large Language Models (LLMs) into enterprise-grade production pipelines via Azure OpenAI APIs. Currently conducting published research on LLM-based invoice entity extraction using multi-model benchmarking (Gemini 2.5 Pro, Llama 4, Mistral). Holds Microsoft Azure Developer Associate (AZ-204) certification and is completing an M.Tech in Computer Science from BITS Pilani. Seeking Australian employer sponsorship (Subclass 482) to contribute AI/ML and cloud engineering expertise to the Australian technology sector.

CORE COMPETENCIES

Backend Engineering Java 8/11/17 · Spring Boot · RESTful APIs · Microservices · JPA/Hibernate	AI / GenAI Integration Azure OpenAI · LLM Benchmarking · Gemini 2.5 Pro · Llama 4 · Maverick · Mistral · Prompt Engineering	Cloud & DevOps Microsoft Azure (AZ-204) · AWS Fargate · Docker · Kubernetes · CI/CD · Jenkins
Data & Databases PostgreSQL · MongoDB · BigQuery · Neo4j · Redis/Caching · Spring Batch	Frameworks & Tools ReactJS · Gradle · Maven · Git · Swagger · Postman · Elastic Stack · Splunk	Research & ML Stack Google Cloud Document AI · Vertex AI · Python · OCR/NLP · Entity Extraction

PROFESSIONAL EXPERIENCE

Lead API Developer | MetLife · Noida, India *Oct 2025 – Present*

- Architect and deliver high-performance REST APIs consumed across multiple MetLife digital channels including Conversational IVR and Mobile, handling enterprise-scale transaction volumes.
- Reduced database load by 40% by designing a distributed caching layer using MongoDB as a query-result store, improving average API response latency by ~55%.
- Engineered an automated vulnerability reporting pipeline using Spring Batch, Splunk, and Prisma — eliminating manual daily reporting effort (~8 hrs/week) and ensuring 100% on-time compliance delivery.
- Led end-to-end migration of observability infrastructure from Splunk/AppDynamics to Elastic Dashboard, improving log query performance and reducing tooling costs.
- Collaborate with cross-functional teams in Agile sprints to define API contracts, conduct code reviews, and maintain zero critical-defect deployment record.

Software Developer (Consultant) | Deloitte · Gurugram, India *Jul 2023 – Oct 2025*

- Built a Generative AI solution using Azure OpenAI APIs and Python to automate JUnit test case generation, reducing manual QA effort by 200% — recognised with Applause Award and client commendation.
- Designed Java-based integration layers connecting enterprise applications to Azure Queue Storage and Azure Blob Storage, reliably processing 500 GB+ of daily data throughput with zero data loss.
- Delivered a zero-downtime Java 11 → Java 17 migration and JBoss platform upgrade across multiple production applications, receiving team and client recognition for minimal defect rate.
- Developed RESTful microservices with Spring Boot following clean architecture principles; improved code maintainability scores (SonarQube) by 30% across the codebase.
- Contributed to CI/CD pipeline improvements using Jenkins and Docker, cutting deployment cycle times by 25%.

RESEARCH & PROJECTS

LLM Invoice Entity Extraction — Research Paper | *Targeting EMNLP 2026 Industry Track*

- Designed and implemented a full research pipeline (Spring Boot 3.2 / Java 21 / Gradle) benchmarking 6 LLMs — Gemini 2.5 Pro, Gemini 2.0 Flash (Vertex AI), Llama 4 Maverick, Llama 3.3-70B, Mistral Medium, and Nemotron OCR — on structured invoice entity extraction tasks.
- Leveraged Google Cloud Document AI, PostgreSQL (Cloud SQL), Neo4j AuraDB, and BigQuery for data ingestion, ground-truth storage, and results analytics across 32+ synthetic invoice documents.
- Key findings: date field accuracy reached 1.0 after normalisation fixes; company name extraction identified as universal weakest field; inverse accuracy–consistency relationship discovered across model families.
- Deployed on Google Cloud Run with automated IAM, Cloud SQL connector configuration, and Spring Batch sequence management for reproducible experiment runs.

Document AI Recognition System | *Full-Stack · Spring Boot + React.js + AWS*

- Built a production-ready document recognition system with Spring Boot backend and React.js frontend, integrated with Azure AI Services for OCR and intelligent field extraction.
- Deployed on AWS Fargate with auto-scaling infrastructure to support document uploads and multi-format data extraction at scale.

Australian Job Auto-Applier Tool | *Playwright · TypeScript*

- Engineered a browser-automation pipeline using Playwright/TypeScript targeting Australian job portals (SEEK, LinkedIn) with visa-sponsorship filtering, demonstrating initiative toward the Australian market.

EDUCATION

M.Tech, Computer Science (AI/ML specialisation) — BITS Pilani (WILP) *Apr 2026 – 2028 (In Progress)*

- Pursuing a postgraduate computer science degree from one of India's premier technical universities, with coursework spanning machine learning, advanced algorithms, and distributed systems.

B.Tech, Mechanical Engineering — SVNIT Surat (National Institute of Technology) *2019 – 2023*

- GPA: 8.5/10 — Graduated from a nationally ranked NIT with a strong engineering foundation; transitioned to software engineering leveraging analytical and systems-thinking skills.

CERTIFICATIONS

Microsoft Certified: Azure Developer Associate (AZ-204) · Microsoft
Java Programming and Data Structures · Coursera / Duke University

AUSTRALIAN WORK ELIGIBILITY

Actively seeking employer sponsorship for Subclass 482 (Temporary Skills Shortage) visa under ANZSCO 261313 — Software Engineer. Nominated occupation is on the Medium and Long-term Strategic Skills List (MLTSSL). English proficiency above the 60th percentile on ISC (81st percentile, equivalent to IELTS 7.0+). Available for relocation to any Australian city. Open to discussing sponsorship costs and transition timelines.
